Fund description

Kempen Orange Investment Partnership is a fund-of-hedge-funds with a diversified exposure to hedge fund strategies. The portfolio typically consists of between 15 and 35 underlying hedge funds. The fund has an unconstrained mandate and can invest in a wide array of strategies, ranging from directional strategies such as long-biased long/short equity to global macro and non-directional arbitrage strategies. The fund can invest in all asset classes and the structure of the fund (see overleaf for the terms) also allows for investments in less liquid opportunities like distressed debt.

Hedge funds are sourced through an extensive industry network that shares a preference for focused, independent investment managers above the larger traditional asset managers. The concentrated investment approach allows for a thorough due diligence process that is executed by an experienced and specialized team. The members of the investment committee have an average industry experience of over twenty years (see overleaf for all members of the investment committee).

The objective of the fund is to generate a long-term return in excess of the relevant risk free rate + 4%.
